The challenges presented by the global economic and financial crisis, its repercussions on the economy, labor markets, and the persistent threat of climate change demonstrate that it is imperative to work towards a coordinated and joint global response of the international community. Success in this regard is of critical importance in order to further secure sustainable global development. On the occasion of the UN Conference on the Financial and Economic Crisis and its Impact on Development, the Friedrich Ebert Stiftung wishes to invite representatives of civil society to discuss both these matters of concern to the international community and the current status of negotiations for an outcome document with the German Minister of Economic Cooperation and Development, Mrs. Heidemarie Wieczorek-Zeul.
